

**Amendments to the Specification:**

Please amend the specification as follows:

Please replace paragraph number [0037], with the following rewritten paragraph:

[0037] In addition, as shown in Fig. 1, since heat exchanger 30 is integrally assembled with structural member 80 at a lower portion of the drive unit, it becomes possible to effectively utilize a conventional wasted space of the drive unit, and therefore it is possible to downsize the drive unit totally. Further, since it is possible to dispose heat exchanger 30 in an oil pan 31c set at a lowermost portion of the drive unit of the electric vehicle, heat exchanger 30 can effectively perform as an oil sump and heat exchanger.
